## Spring 2020 Price List

### Oats in 2 Bu. bags, or 60 Bu. Bulk Bags

Goliath, Hayden

**Hayden Oats** — Developed by South Dakota State University and released in 2015. Hayden has medium-late maturity, Heading about 4 days later than Shelby 427. Hayden will be between Shelby 427 and Goliath oats in height. Hayden is resistant to smut and BYDV. It is moderately susceptible to crown rust and stem rust as observed by SDSU. Hayden has excellent yield potential as a grain oat and as a forage product as well.

**Goliath Oats** - This was a new release in 2012 from SDSU. It is aptly named because of its height. It is a multi-purpose oat that may be used for forage, grain production, and straw. It has excellent straw strength, but should not be planted on very high fertility soils unless it will be harvested for forage. It has an excellent disease resistance package with resistance to crown rust, stem rust, barley yellow dwarf virus, and smut.

### Barley in bushel bags or 40 bu Bulk Bags

Haymaker - forage

Lacy - grain

### Triticale

Triticale - VNS Spring

### Retail

Bulk Bags	\$10.00/Bu
2 Bushel Bags	\$11.00/Bu
