WB4792 is a Hard Red Winter Wheat variety with excellent yield potential and test weight and very good standability. This medium-late-maturing variety has good drought tolerance and grazing potential and is adapted to the western plains.

- **Excellent Yield Potential**
- **Strong Western Adaptation**
- **Very Good Yellow (Stripe) Rust Tolerance**
- **Very Good Wheat Streak Mosaic Virus Tolerance**
- **Single-Use License Variety**

OPTIMAL SEEDING RATE

Seed size and density impacts how many seeds are in a pound. To enhance your results, you need to know how many seeds to plant per acre and how many seeds are in a pound. An accurate seed count can make all the difference. Learn more at WestBred.com

Ratings are Internal Bayer Crop Science Wheat Breeding Research Data. Performance may vary from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's yields.
